Username	Feedback
Akash Gupta	This Website is user friendly and have a Great user interface
Ernest Edison	I wanted to buy our home in Delhi, but the price of properties has been skyrocketed every year. Meanwhile, I contacted many home builders and developers for affordable and yet beautiful apartments.
Saumya	This Website is user friendly and have a Great user interface
John Keats	Presently, I am living in Bangalore and soon I will Shift to my own flat which I have booked under BrokersBunch. In beginning, I met with many builders and went their actual sites. Some offered luxuriant apartments but the price were high. Some societies were under construction and there was no idea about the possession. After scrutiny and market research, I booked the flat under BrokersBunch. Their societies drenched with lush of greenery and provide the eco friendly environment. I am glad on my decision.
Thomas Hamingway	BrokersBunch has delivered best quality apartments and possess the capability to envision their buyer's requirement. After having visited the sites of many builders & after checking BrokersBunch reviews, we chose it. Today I am very much happy & satisfied with my decision of taking flat in BrokersBunch due to their quality and delivery.

# Conclusion

The whole duration of this project has been a great learning experience from us. It has introduced us more to the working of the real world projects and the problems that we face while developing them.

By development of this website, we here by conclude that at BrokersBunch we have achieved our aim at creating a platform where we have created and promoted a healthy environment for the interaction of the community of Brokers and Clients.

We also conclude that our project makes it easy for the Clients to purchase properties and Brokers to list the properties, register themselves on the website as well as clients can book appointment for brokers for different properties.

We also hope to expand the scale of the project and make it ubiquitous by developing it for all digital platforms.
